To Whom It May Concern,

RE: Mr Gavin Avery DOB: 16/09/1985
9 Bromley Place, KINGSLEY WA 6026

The above patient was seen in my rooms regarding treatment for morbid obesity. He has failed conservative management with various diets, medications (Saxenda) and exercise. There is a significant amount of evidence in a medical literature to support surgery as an effective treatment option for obesity. The long-term consequences of obesity can be devastating. These include reduced life expectancy, medical conditions such as diabetes, heart disease, arthritis, mental health illness, high blood pressure and high cholesterol. The risk of getting certain cancers is also increased by more than 2 to 3 fold. Mr Avery will benefit from weight loss surgery and I hope this letter will assist you with your assessment.

Yours sincerely

Mr Siva Sundararajan
